

## What people are saying about

### In general...

She [presenter] did a super job! She was clear and concise, answered all questions, and explained things very well.

Best parts of this seminar were the helpful suggestions and listening to others with similar situations.

It was all good. I am so relieved to learn that there are resources. Also to know that the challenges I am encountering are not at all uncommon! YOU'RE A GODSEND – THANK YOU!

### Caregiving skills...

This presentation will help me to provide more focused care. Thanks for the information sources.

Better able to assess needs of elder parent.

My father is living alone 400+ miles away so the resources for long-distance care were most useful.

Realities of caregiving weren't glossed over.

This has helped me realize that even if everything I do may not work, I should continue trying.

It will help me get started and end "analysis paralysis."

Much better approaches that I'll share with siblings.

### One employer said...

The employees who attended really appreciated the seminars and the written materials provided. We accomplished a general feeling that we care about the employees' lives outside of work, too. Employees also have info and resources to use. Happy to serve as a reference!

## What people are saying about

### Financial and legal...

The financial and legal handouts were wonderful.

I gained a lot of knowledge. Also made me consider and plan for other scenarios that haven't occurred yet.

I can now discuss Power of Attorney and Advance Directives, and get mom to consider – possibly complete – both!

### Family communications...

Talked to mother about burial, possessions, etc. Never talked about these things before.

I understand family dynamics and decision making better.

I've restructured my conversations with parents. Also, feel more empowered to act on my concerns.

### Housing...

I'm more able to counsel my elderly parents about housing options.

I have a better grasp of "the lingo" of assisted living and nursing homes.

The information for contacts in other states regarding housing issues was great.
